## **CITY MANAGER – MISCELLANEOUS ITEMS**

City Manager provided information to Council regarding construction of a cemetery columbarium for cremains. City Manager stated that at the last Cemetery Board meeting, the members recommended going with a small one which contains 72 niches. City Manager stated that the total cost will be around \$63,000. City Manager stated that the Cemetery Board is going to use the Cemetery Trust funds to pay for it and the City would pay that fund back with the sales of the niches. Council was in agreement to move forward with the project.

City Manager provided information to Council regarding the proposed electric rate redesign provided by UFS who did the rate study for the City. City Manager stated that the proposed rate design would provide rate relief for large users and start the process of getting base rates

in line with the market and industry standard. Council was in agreement to move forward with the steps needed to implement.

City Manager provided information to Council regarding the sewer treatment plant design plan. Randy Burk, TWM Vice President, was present and provided additional information. Council asked questions and discussed the plan and was in agreement to have staff move forward with the project.

City Manager provided information to Council regarding the conversations and negotiations with the Greystone Manor developer to pay the City back for debts owed for infrastructure by the developer. City Manager stated that he had worked out a proposal with the developer which Council had agreed to which was to use the funds the City owes the developer on the Townsend Square lift station and apply that to the debt he owes us and there would be a remaining balance which was paid by the developer this week. City Manager stated that the developer did offer another solution which would be for him to add \$1,000 to the lots he still owns in Greystone to pay the City back. City Manager stated that the City would probably get paid back faster under that scenario but the City would still have to continue do the accounting and keeping track of the debt owed. City Manager stated that he does not like the fact that it seems the City is having to make a new deal to undo a deal done in the past. City Manager stated that he has been trying to work with the developer to get the money owed to the City and keep it out of litigation. Council discussed whether or not to make the new deal to pay off the old deal or to have the developer agree to what was already proposed. Councilman Grodeon stated that he did not agree to any future deals and is not in favor of issuing any building permits until the bills are paid. Mayor and Councilman Weyant were in favor of going with the newer proposal to pay back the debt through the sale of the lots in Greystone.
