Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

SECTION I. INTRODUCTION

On March 20, 2000, the City of Mascoutah ("City") passed Ordinances adopting and establishing the TIF 2B Redevelopment Plan ("Original Plan") and Redevelopment Project Area ("Area"). The Area can be seen in Exhibit A. On November 3, 2014, the City of Mascoutah passed an Ordinance establishing a Public Hearing to give notice of the City's intent to amend that Original Plan. Such action was deemed desirable as part of the City's continuous effort to maximize the potential of the TIF District.

This Amended TIF 2B Redevelopment Plan ("Amended Plan") includes the following activities:

A. Findings of Need for Tax Increment Financing

1. The Redevelopment Area Exceeds the Statutory Minimum Size
2. The Redevelopment Project Area is Contiguous
3. All Properties Included will Substantially Benefit
4. The Area, on the Whole, is not Subject to Growth
5. The TIF Plan and Project Conform with the City's Community Plan
6. The Redevelopment Plan Meets the Statutory Timeframe
7. The Assessment of Financial Impacts on Taxing Districts is Outlined

B. Redevelopment Plan

1. Update and replace Section V of the Original Redevelopment Plan;
2. Expand upon the redevelopment plan objectives;
3. Updated mapping of the Area, including a Boundary Map attached as Exhibit A and a Future Land Use Map attached as Exhibit B; Please note that the City has not amended the original Area.
4. Update of the Original Plan's policies, as well as outline the policies regarding the Amended Plan;
5. Create a redevelopment project outlining the private and public redevelopment activities of the Amended Plan;

C. Implementation Plan

1. Outline estimated redevelopment project costs;
2. Amended projected project cost and estimated budget;

D. Amending the TIF Plan

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

E. Reporting and Meeting

Tax Increment Financing is permitted by the Illinois Tax Increment Allocation Redevelopment Act (the "Act" or the "TIF Act"), which is found at 65 ILCS 5/11-74.4-1 et. seq. The Act sets forth the requirements and procedures for establishing the Area and the Plan. Additionally, this portion of the Act has provisions for amending a redevelopment plan and project.

SECTION II. AMENDMENT TO TIF 2B REDEVELOPMENT PLAN

A. FINDINGS OF NEED FOR TAX INCREMENT FINANCING

The original study determined that the Area qualified for tax increment financing as a "conservation area." In addition to that determination, the Act requires that additional criteria be met before adopting a Redevelopment Plan. These additional findings follow.

- 1. The Redevelopment Area Exceeds the Statutory Minimum Size**
The Redevelopment Area encompasses 678 parcels of developed and undeveloped property, rights-of-way, and City and County property totaling approximately 163 acres. The City, therefore, meets this requirement, as the Area contains more than the required 1 ½-acre minimum as defined in the Act. The Boundary Map of the Area is attached as Exhibit A.
- 2. The Redevelopment Project Area is Contiguous**
The Mascoutah TIF 2B Redevelopment Area is contiguous and contained within a single perimeter boundary. Therefore, the City meets this requirement.
- 3. All Properties Included will Substantially Benefit**
The City believes that tax increment financing will substantially benefit all properties included in the Redevelopment Project Area.
- 4. The Area, on the Whole, is not Subject to Growth**
Prior to the original Plan's passage there was insignificant private investment and growth in the Area.
- 5. The TIF Plan and Project Conform with the City's Community Plan**
The City has determined that this Redevelopment Plan is consistent with the goals and objectives of the Comprehensive Plan and other plans for the community as a whole. All future development in the Redevelopment Project Area will continue to conform to applicable codes and ordinances as may be in effect at that time.
- 6. The Redevelopment Plan Meets the Statutory Timeframe**
The estimated date for the completion of the Redevelopment Plan shall be no later than twenty-three (23) years from the adoption of the original Redevelopment Plan and Project by the City. If available and deemed appropriate by the City, obligations incurred to finance improvements in the Area will be repaid by incremental revenues, which may be supplemented with funds from other sources such as local taxes, State or Federal loans or grants.
- 7. The Assessment of Financial Impacts on Taxing Districts is Outlined**
The City of Mascoutah finds that the financial impact or increased demand for facilities or services resulting from the original implementation of the Redevelopment Project on local taxing districts is minimal. The City, to the extent that surplus revenues become available, will distribute such revenues on a pro-rata basis to local taxing bodies whenever possible.

B. REDEVELOPMENT PLAN

This section presents the Amendment for the Mascoutah TIF 2B Redevelopment Plan. A redevelopment plan is defined in the Act in the following manner:

...the comprehensive program of the municipality for development or redevelopment intended by the payment of redevelopment project costs to reduce or eliminate those conditions the existence of which qualified the redevelopment project area as a blighted area or conservation area or combination thereof or industrial park conservation area, and thereby to enhance the tax bases of the taxing districts which extend into the Redevelopment Project Area.

1. Future Land Use Plan

The Future Land Use Plan for the Area is shown in Exhibit B. The Redevelopment Project shall be subject to the provisions of the City's ordinances and other applicable codes as may be in existence and may be amended from time to time.

2. Objectives

The objectives of the Amended Redevelopment Plan are to:

- a. Reduce or eliminate those conditions outlined as part of the Original Plan's eligibility study that may still exist in the Area;
- b. Prevent the recurrence of those qualifying conditions which exist within the Area;
- c. Enhance the real estate tax base for the City and all other taxing districts which extend into the Area;
- d. Encourage and assist private development within the Area through the provision of financial assistance for new development as permitted by the Act. This will provide for expanded employment opportunities that will strengthen the economic base of the City and surrounding areas;
- e. Complete all public and private actions required in this Plan in an expeditious manner so as to maximize redevelopment opportunities.

3. Policies

Appropriate policies have been, or will be, developed by the City in regards to the continuance of this Plan and Redevelopment Project. These policies include, but are not limited to, the following:

- a. Use TIF-derived revenues to accomplish the specific public activities and actions outlined in the Implementation Strategy of the Plan.
- b. Utilize City staff and consultants to undertake those actions necessary to accomplish the specific public activities as outlined in the Implementation Strategy of the Plan.
- c. Actively market the Area to private developers.

Exhibit B - Future Land Use Map

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

- d. Provide financial assistance, as permitted by the Act, to encourage private developers to complete those certain private actions and activities as outlined in this Plan.
- e. Seek out additional sources of revenue to help "kick start" development and redevelopment activities in the Area.
- f. Continue to monitor the public and private actions and activities occurring within the Area.
- g. Complete the specified actions and activities in an expeditious manner, striving to minimize the length of the existence of the Area.

These policies may be additionally amended from time to time as determined by the City.

4. Redevelopment Project

To achieve the objectives of the TIF Redevelopment Project, a number of activities will need to be undertaken. An essential element of the Redevelopment Plan is a combination of private developments in conjunction with public investments and infrastructure improvements. Improvements and activities necessary to implement the Plan may include, but are not limited to, the following:

a. Private Redevelopment Activities

The private activities proposed for the Area may include, but are not limited to:

- On-site infrastructure upgrades;
- Recruitment of new development to the City; marketing of available properties to alleviate the vacancies throughout the Area, especially in the downtown portion of the Area;
- Repairing, remodeling, and site improvements to existing buildings throughout the Redevelopment Project Area; rehabilitation to the aging structures in the downtown commercial district;
- Historic Preservation;
- Demolition of unsafe structures if necessary;

b. Public Redevelopment Activities

Public improvements and support activities will be used to induce and complement private investment. These may include, but are not limited to:

- Costs of engineering, architectural, or professional studies related to economic development of the Area;
- Land assembly, site preparation, building demolition, and, where and when necessary, environmental remediation;

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

- Public utilities: removal and/or burying of overhead utility service; storm sewer installation; repair/replace aging portions of water and sanitary sewer systems; repair/replace the City's water tower; improve the storm water drainage system, including the replacement of the storm sewer inlets, mains, ditches, and culverts in order to improve the reliability of the system;
- Street work, including street lighting replacement and/or upgrading in both residential and public use areas, as well as curb and gutter construction, repair, or replacement, sidewalk and pedestrian walkway construction, repair, or replacement; upgrades of the existing street network.
- Costs of rehabilitation, reconstruction or repair or remodeling of existing public or private buildings;
- Costs of demolition of public or private buildings;
- Marketing of properties;
- Financing costs, including those related to the issuance of obligations; interest cost incurred by a redeveloper related to the construction, renovation or rehabilitation of a redevelopment project;
- Relocation costs, to the extent that a municipality determines that relocation costs shall be paid, or is required to make payment of relocation costs by federal or state law;

C. IMPLEMENTATION STRATEGY

1. Introduction

The development and follow-through of a well-devised implementation strategy is an essential element in the success of any Plan. In order to maximize program efficiency, take advantage of both current and future interest in the Area, and with full consideration of available funds, a phased implementation strategy will be employed. This will allow the City to better manage public expenditures used to spur development within the Area by addressing public concerns.

In order to maintain an appropriate balance between private investment and public improvements, the City will work to adopt the Redevelopment Plan. Once the Plan is adopted, the City will negotiate redevelopment agreements with private developers who will propose the use of tax increment funds to facilitate a Redevelopment Project.

2. Estimated Redevelopment Project Costs

Costs that may be incurred by the City as a result of implementing the Plan may include, without limitation, project costs and expenses and any other costs that are eligible under the Act. Such itemized costs include the following:

- a. The costs of studies, surveys, development of plans, and specifications, implementation and administration of the Plan including but not limited to staff and professional service costs for architectural, engineering, legal, financial, planning or other services.
- b. The cost of marketing sites within the Area to prospective businesses, developers, and investors.
- c. Property assembly costs, including but not limited to acquisition of land and other property, real or personal, or rights or interest therein, demolition of buildings, site preparations, site improvements that serve as an engineered barrier addressing ground level or below ground environmental contamination, including, but not limited to parking lots and other concrete or asphalt barriers, and the clearing and grading of land.
- d. Costs of rehabilitation, reconstruction or repair or remodeling of existing public or private buildings, fixtures, and leasehold improvements; and the cost of replacing an existing public building if pursuant to the implementation of a Redevelopment Project the existing public building is to be demolished to use the site for private investment or devoted to a different use requiring private investment.
- e. Cost of construction of public works or improvements, not to include the cost of constructing a new municipal building principally used to provide offices, storage space, or conference facilities or vehicle storage, maintenance, or repair for administrative, public safety, or public works personnel and that is not intended to replace an existing public building unless the municipality makes a reasonable determination in the Plan, supported by information that provides the basis for that determination, that the new municipal building is required to meet an increase in the need for public safety purposes anticipated to result from the implementation of the Plan.

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

- f. Cost of job training and retraining projects, including the cost of "welfare to work" programs implemented by businesses located within the Area.
- g. Financing costs, including but not limited to, all necessary and incidental expenses related to the issuance of obligations, and which may include payment of interest on any obligations issued there under accruing during the estimated period of construction of any Redevelopment Project for which such obligations are issued and for not exceeding thirty-six (36) months thereafter, and including reasonable reserves related thereto.
- h. To the extent the municipality by written agreement approves the same, all or a portion of a taxing district's capital costs resulting from the Redevelopment Project necessarily incurred or to be incurred within a taxing district in furtherance of the objectives of the Plan and Redevelopment Project.
- i. An elementary, secondary, or unit school district's increased costs attributable to assisted housing units located within the Area for which the developer or redeveloper receives financial assistance through an agreement with the municipality or because the municipality incurs the cost of necessary infrastructure improvements within the boundaries of the assisted housing sites necessary for the completion of that housing.
- j. Relocation costs to the extent that a municipality determines that relocation costs shall be paid or is required to make payment of relocation costs by federal or state law.
- k. Payments in lieu of taxes.
- l. Costs of job training, retraining, advanced vocational education or career education, including but not limited to courses in occupational, semi-technical or technical fields leading directly to employment, incurred by one or more taxing districts, provided that such costs (i.) are related to the establishment and maintenance of additional job training, advanced vocational education or career education programs for persons employed or to be employed by employers located in the Area; and (ii.) when incurred by a taxing district or taxing districts other than the municipality, are set forth in a written agreement by or among the municipality and the taxing district or taxing districts, which agreement describes the program to be undertaken, including but not limited to the number of employees to be trained, a description of the training and services to be provided, the number and type of positions available or to be available, itemized costs of the program and sources of funds to pay for the same, and the term of the agreement. Such costs include, specifically, the payment by community college districts of costs pursuant to Sections 3-37, 3-38, 3-40 and 3-40.1 of the Public Community College Act and by school districts of costs pursuant to Sections 10-22.20a and 10-23.3a of the School Code.
- m. Interest cost incurred by a redeveloper related to the construction, renovation or rehabilitation of a Redevelopment Project provided that:
 - i. Such costs are to be paid directly from the special tax allocation fund established pursuant to this Act;

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

- ii. Such payments in any one-year may not exceed 30% of the annual interest costs incurred by the redeveloper with regard to the Redevelopment Project during that year;
 - iii. If there are not sufficient funds available in the special tax allocation fund to make the payment pursuant to this paragraph then the amounts so due shall accrue and be payable when sufficient funds are available in the special tax allocation fund;
 - iv. The total of such interest payments paid pursuant to this Act may not exceed 30% of the total (i) cost paid or incurred by the redeveloper for the Redevelopment Project plus (ii) redevelopment project costs excluding any property assembly costs and any relocation costs incurred by a municipality pursuant to this Act;
 - n. Unless explicitly stated within the Act, the cost of construction of new privately-owned buildings shall not be an eligible redevelopment project cost.
 - o. None of the redevelopment project costs enumerated above shall be eligible redevelopment costs if those costs would provide direct financial support to a retail entity initiating operations in the Area while terminating operations at another Illinois location within 10 miles of the Area but outside the boundaries of the municipality.
3. **Estimated Budget for Redevelopment Project Costs**
The estimated redevelopment project costs associated with the eligible public redevelopment activities are presented in Table A - Estimated Budget for Redevelopment Project. This budget is for the entire Area and includes the figures from the original budget. This estimate includes reasonable and necessary costs incurred or estimated to be incurred during the implementation of the Plan. The estimated costs are subject to change as specific plans and designs are themselves subject to change.

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
 City of Mascoutah, Illinois

TABLE A - ESTIMATED BUDGET FOR REDEVELOPMENT PROJECT

DESCRIPTION	ESTIMATED COST
Costs of studies, surveys, development of plans and specifications, including staff and professional service costs for architectural, engineering, legal, environmental, marketing, or other services;	\$125,000
Property assembly costs; including acquisition of land and other property, real or personal; demolition of structures, site preparation, and the clearing and grading of land;	\$675,000
Costs of rehabilitation, reconstruction, repair, or remodeling of existing public or private buildings, fixtures, or leasehold improvements;	\$2,500,000
Costs of the construction of public works or improvements (construction or reconstruction of rights of way, additional safety barriers, streets, roadways, curbs and gutters, street lighting, sidewalks, bicycle pathways, and public utilities, including storm and sanitary sewers, and lift stations);	\$5,541,337
Financing costs; including those related to the issuance of obligations; interest cost incurred by a redeveloper related to the construction, renovation, or rehabilitation of a redevelopment project;	\$1,250,000
Relocation costs to the extent that the municipality determines that these costs shall be paid, or is required to make payment of relocation costs by federal or state law;	\$700,000
TOTAL ESTIMATED BUDGET	\$10,791,337

Expenditures in individual categories may differ from those shown above; however, the total amount of the Estimated Redevelopment Project Costs will not exceed \$10,791,337 plus any additional interest and financing costs as may be required.

4. Most Recent Equalized Assessed Valuation (EAV)

The 2013 total equalized assessed valuation for the Area is approximately \$19,690,587. The Base EAV of the Project Area, set in 1999, is \$8,143,485. A list of all parcels within the Area, as of 2013 County records, is attached as Appendix B.

5. Redevelopment Valuation

It is anticipated that private developments and/or improvements will occur within the Area. After discussions with the City, it has been estimated that private investment will increase the EAV by an additional \$9,000,000. This figure is in present day dollars, and takes into account only the investment driven valuation increase. Therefore, after redevelopment, the total estimated EAV, in present day dollars, will be approximately \$28,000,000.

6. Source of Funds

The primary source of funds to pay for redevelopment project costs associated with implementing the Plan shall be funds collected pursuant to tax increment allocation financing. Under such financing, tax increment revenue, in the form of increases in the equalized assessed value (EAV) of property in the Redevelopment Project Area, shall continue to be allocated to a special fund each year (the "Special Tax Allocation Fund"). The assets of the Special Tax Allocation Fund shall be used to pay Redevelopment

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

Project Costs within the entire Area, and retire any obligations incurred to finance Redevelopment Project Costs.

In order to expedite the implementation of the Redevelopment Plan and construction of the public improvements, the City of Mascoutah, pursuant to the authority granted to it under the Act, may issue bonds or other obligations to pay for eligible Redevelopment Project Costs. These obligations may be secured by future revenues to be collected and allocated to the Special Tax Allocation Fund.

If available, revenues from other public and private economic development funding sources will be utilized. These may include state and federal programs, local retail sales tax, land disposition proceeds from the sale of land in the Area, and applicable revenues from any abutting tax increment financing areas in the City. In turn, this tax increment financing Area may also provide monies to abutting tax increment financing areas in the City, if any.

7. Nature and Term of Obligation

The principal source of funding for the Redevelopment Project will be the deposits into the Special Tax Allocation Fund of monies received from taxes on the increased value of real property in the Area.

In order to expedite the implementation of the Amended Plan, the City of Mascoutah, pursuant to the authority granted to it under the Act, may issue obligations to pay for the Redevelopment Project Costs. These obligations may be secured by future amounts to be collected and allocated to the Special Allocation Fund. Such obligations may take the form of any loan instruments authorized by the Act.

Revenues received in excess of 100% of funds necessary for the payment of principal and interest on the obligations, and not earmarked for other Redevelopment Project Costs or early retirement of such obligations, may be declared as surplus and become available for pro rata distribution annually to the taxing bodies to the extent that this distribution of surplus does not impair the financial viability of the Redevelopment Project.

8. Fair Employment Practices and Affirmative Action

The City will insure that all public and private redevelopment activities are conducted in accordance with fair employment practices and affirmative action. The City will additionally insure that all recipients of tax increment financing assistance adhere to these policies.

9. Certifications

The Illinois TIF statute declares that if a Redevelopment Project Area contains 75 or more inhabited residential units then a municipality shall prepare a separate housing impact study. If, however, the municipality certifies that the redevelopment plan will not result in displacement of residents from 10 or more residential units then no housing impact study is required.

The City hereby certifies under Sections 11-74.4-3(n)(5) and 11-74.4-4.1 of the Act that this Plan and Redevelopment Project will not result in the displacement of 10 or more inhabited residential units. The City therefore has determined that no Housing Impact Study is needed.

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

The City does not anticipate that this Plan will result in the removal of inhabited housing units which contain households of low-income or very low-income persons as these terms are defined in the Illinois Affordable Housing Act. If the removal of inhabited housing units which contain households of low-income or very low-income persons were to occur, the City would provide affordable housing and relocation assistance not less than that which would be provided under the federal Uniform Relocation Assistance and Real Property Acquisition Act of 1970 and the regulations under the Act, including the eligibility criteria, as required by Section 11-74.4-3(n)(7) of the Act.

City of Mascoutah, Illinois

D. AMENDING THE TIF PLAN

This Plan and the Redevelopment Project may be additionally amended in accordance with the provisions of the Act.

Mascoutah TIF 2B Redevelopment Plan and Project as Amended
City of Mascoutah, Illinois

E. REPORTING AND MEETING

The City shall adhere to all reporting and meeting requirements as provided for in the Act.

- VII. Beginning and Ending Equalized Valuation
- VIII. Commitment to Fair Employment and Affirmative Action Plan
- IX. TIF Supporting Information

I. PREFACE

The City of Mascoutah is a community of 5,511 persons (1990 Census) located in the County of St. Clair Illinois and approximately 25 miles southeast of downtown St. Louis and is generally at the crossroads of Illinois Routes 4 and 177. The City was incorporated in 1838 and contains a range of residential, commercial, industrial, agriculture and public land uses.

Overall, the Mascoutah region has not been subject to growth and development by the private sector. Since 1970, the City's population has grown from 5,045 to 5,511 in 1990, an average annual change of approximately 0.4 percent. As part of a strategy to encourage managed growth and stimulate private investment, the City is reviewing an area for the use of tax increment financing ("TIF"). The area identified by the City is described in greater detail later in this report.

II. STATUTORY AUTHORITY

In January, 1977, TIF was made possible by the Illinois General Assembly through passage of the *Tax Increment Allocation Redevelopment Act* (the "Act") 65 ILCS 5/11-74.4-1, *et seq.*, as amended and supplemented from time to time. The Act provides a means for municipalities, after the approval of a redevelopment plan and project, to redevelop blighted, conservation, or industrial park conservation areas and to finance "Project Costs" with incremental property tax revenues. "Incremental Property Tax" or "Incremental Property Taxes" are derived from the increase in the current equalized assessed valuation ("EAV") of real property within the Project Area over and above the "Certified Initial EAV" of the real property. Any increase in EAV is then multiplied by the current tax rate which results in Incremental Property Taxes. A decline in current EAV does not result in a negative Incremental Property Tax.

To finance Project Costs, a municipality may issue obligations secured by estimated Incremental Property Taxes generated within the Project Area. In addition, a municipality may pledge towards payment of such obligations any part or any combination of the following: (a) net revenues of all or part of any redevelopment project; (b) taxes levied and collected on any or all property in the municipality; (c) the full faith and credit of the municipality; (d) a mortgage on part or all of the redevelopment project; or (e) any other taxes or anticipated receipts that the municipality may lawfully pledge, including sales taxes.

Tax increment financing does not generate tax revenues by increasing tax rates, but rather through the temporary capture of new tax revenues generated by the enhanced-valuation of properties resulting from the municipality's redevelopment program, improvements and activities, various redevelopment projects, and the reassessment of properties. Under TIF, all taxing districts continue to receive property taxes levied on the initial valuation of properties within the Project Area. Additionally, taxing districts can receive distributions of excess

Incremental Property Taxes when annual Incremental Property Taxes received exceed principal and interest obligations for that year and expected redevelopment project expenditures necessary to implement the Redevelopment Plan. Taxing districts also benefit from the increased property tax base after project Costs and obligations are paid.

The Illinois General Assembly made two key findings in adopting the Tax Increment Allocation Redevelopment Act:

1. That there exists in many municipalities within the State blighted and conservation areas; and
2. that the eradication of blighted areas and the treatment and improvement of conservation areas by redevelopment projects are essential to the public interest.

To ensure that the exercise of these powers is proper and in the public interest, the Act also specifies certain requirements which must be met before a municipality can proceed with implementing a redevelopment project. One of these requirements is that the municipality must demonstrate that a prospective redevelopment project qualifies either as a "blighted area" or as a "conservation area." In reviewing the proposed TIF District (see enclosed map) it is our findings that the area identified as TIF #2B would meet the eligibility criteria for a "Conservation Area."

III. POWERS AND AUTHORITIES

The Mascoutah, Illinois Tax Increment Finance District #2B shall be created with all the powers and authorities granted such districts by 65 ILCS 5/11-74.4-1 seq., in its present form or as it may be amended from time to time by the Illinois State Legislature.

IV. BASIS FOR REDEVELOPMENT

As set forth in the "Act," "Conservation Area" means any improved area within the boundaries of a redevelopment project area located within the territorial limits of the municipality in which 50 percent or more of the structures in the area have an age of 35 years or more. Such an area is not yet blighted, but because of a combination of 3 or more of the following factors: dilapidation; obsolescence; deterioration; illegal use of individual structures; presence of structures below minimum code standards; excessive vacancies; lack of ventilation, light or sanitary facilities; inadequate utilities; excessive land coverage; deleterious land use or layout; or lack of community planning, is detrimental to the public safety, health, morals or welfare and such an area may become a blighted area.

PROJECT AREA ELIGIBILITY

A quantitative and qualitative review, as well as statistical analysis of the structures within the TIF District, was made to determine if the area met the requirements of a "Conservation Area" as defined by TIF legislation.

1) Age of Structure

The age of structures in a TIF Area is a key factor in the determination of the Area's ability to qualify as a Conservation Area. The State Statute criteria requires that fifty (50) percent or more of the structures in the Area to be thirty-five (35) years of age or more for the Area to qualify as a Conservation Area.

Of the 466 structures within the proposed TIF District it was determined that Two hundred ninety-two (292) or 63% of the structures in the Redevelopment Area are thirty-five (35) years of age or more.

Age as a factor is present to a major extent within the redevelopment area.

2) Lack of Community Planning

This factor means that no community planning existed or was considered inadequate when portions of the TIF District was developed. Prior to 1969 there was no evidence of any formal adopted plans by the City of Mascoutah.

The majority of the built-up portions of the study area were developed prior to community planning efforts of the City. Structures and streets were built without compliance to basic development codes (Zoning and Subdivision Regulations). The central business district lacks convenient parking and lot sizes in many areas discourage redevelopment.

Lack of community planning exists to a major extent in the redevelopment area.

3) Inadequate Utilities:

Inadequate utilities can be defined when a utility (water, sewer, etc.) is undersized, deteriorated because of age, or is inadequate to meet the needs of the area in which it is located. Within the proposed Tax Increment Finance District #2B the consulting City Engineer has identified areas where improvements are needed to the water and sewer distribution system. These improvements are determined to be necessary so that these areas can have the same quality of service as other areas of the community.

4) Presence of Structures Below Minimum Code Standards

In reviewing the proposed #2B TIF District encompasses a large portion of the older developed area in Mascoutah. Because a large portion of this area was developed and built prior to the adoption of zoning, subdivision, and other governmental codes, it is evident that many structures and parcels of land fall below the presently adopted standards. Failing to meet the required zoning setback requirements, lot sizes below the minimum lot standards, and structures below minimum building code requirements were found within the district. The presence of structures below minimum code standards is a factor within the redevelopment area

BASED UPON A REVIEW OF "CONSERVATION AREA" TIF REQUIREMENT THE SOUTHWESTERN ILLINOIS PLANNING COMMISSION HAS DETERMINED THAT THE PROPOSED MASCOUCAH TIF #2B IS ELIGIBLE UNDER THE STATE GUIDELINES.

REDEVELOPMENT IMPROVEMENTS GOALS

Without the adoption of a Redevelopment Plan, and TIF, the Project Area is not reasonably expected to be redeveloped by private enterprise. In the absence of City-sponsored redevelopment initiatives there is a prospect that conservation conditions will continue to exist and spread and adjacent properties will become less attractive for development or redevelopment.

V. REDEVELOPMENT PLAN

The main objective of this redevelopment plan is the adoption of a program of development and redevelopment for the Mascoutah TIF Districts to reduce or eliminate the conditions which caused the area to qualify as a Conservation Redevelopment Area. The individual objectives aim to enhance the tax base of all the taxing districts which overlap the area and to induce private investment in the area.

The following identify, in capsule, the redevelopment plan objectives:

- encourage housing development contiguous to existing development.
- encourage mixed-use shopping/retail/commercial development.
- encourage the development of infrastructure improvements throughout the redevelopment area.
- encourage the upkeep and redevelopment of existing housing and businesses.

The City of Mascoutah also certifies that displacement of residents from inhabited residential dwelling units will not result from the implementation of this plan.

The City also finds based upon its analysis that the project area on the whole has not been subject to growth and development through the normal private enterprise process. Implementation of this plan should not have any major financial impact on or any increased demand for services for taxing districts affected by the plan.

The City of Mascoutah, after consulting with the Southwestern Illinois Planning Commission (SMAPC), also finds that the TIF #2B plan conforms to the "City of Mascoutah Comprehensive Plan" for the development of the municipality as a whole.

The life of the Mascoutah TIF #2B District is expected to be twenty-three (23) years. For maximum effectiveness, the strategy will be to provide incentives to begin specific projects as soon as possible after formal adoption of the District.

The City of Mascoutah anticipates the expenditure of approximately \$8,791,337 for public infrastructure costs. These public costs include all reasonable or necessary costs incurred or expected for the implementation of this Plan. Specifically, these costs include the following:

PROJECTED PROJECT COST MASCOUTAH "TIF #2B" DISTRICT*

Railway St. Asphalt Overlay	46,919.00
Route 4 Bituminous Shoulders	187,201.00
Curb, Gutter, & Street Improvements (excluding projects (above))	6,173,365.00
Sanitary Sewer Replacement	864,622.00
Water Distribution System Improvements	943,250.00
Downtown Redevelopment (Sidewalks, Lighting and Parking)	287,500.00
Surface Drainage Improvements (retention)	288,480.00
Total	\$8,791,337.00

* In 1999 Dollars

In addition to TAX INCREMENT FINANCING the City of Mascoutah may include the following sources of funds to assist in implementing this plan - grants, general tax revenue, utility taxes, motor fuel tax, general revenue bonds, and other lawful revenue sources.

VI. DISSOLVING OF TIF DISTRICT #2B

The Mascoutah Tax Increment Finance District #2B may be dissolved after creation according to the process and procedures set forth in 65 ILCS 5/11-74.4 **TAX INCREMENT ALLOCATION REDEVELOPMENT ACT** in its present form or as it may be amended from time to time by the Illinois State Legislature.

However, should 65 ILCS 5/11-74.4 not address the disposition of funds held by a Tax Increment Finance District, said funds held by the City of Mascoutah Tax Increment Finance District #2B will be disbursed by using the following procedure as a guide for said disposition. Any real property tax funds (including interest) of the City of Mascoutah Tax Increment Finance District #2B unencumbered by financial obligation, will be turned over to the appropriate taxing district, based upon a pro-rata basis relative to the most recent tax rates in effect for those district at the time of the dissolving of the Tax Increment Finance District #2B.

VII. BEGINNING AND ENDING EAV

The current 1998 Equalized Assessed Valuation (EAV) of the Redevelopment area is approximately \$8,143,485. If fully redeveloped it is anticipated that the EAV will increase to approximately \$15,000,000.

VIII. COMMITMENT TO FAIR EMPLOYMENT AND AFFIRMATIVE ACTION PLAN

The City will comply with fair employment practices and the Development will comply with all Affirmative Action Plans.

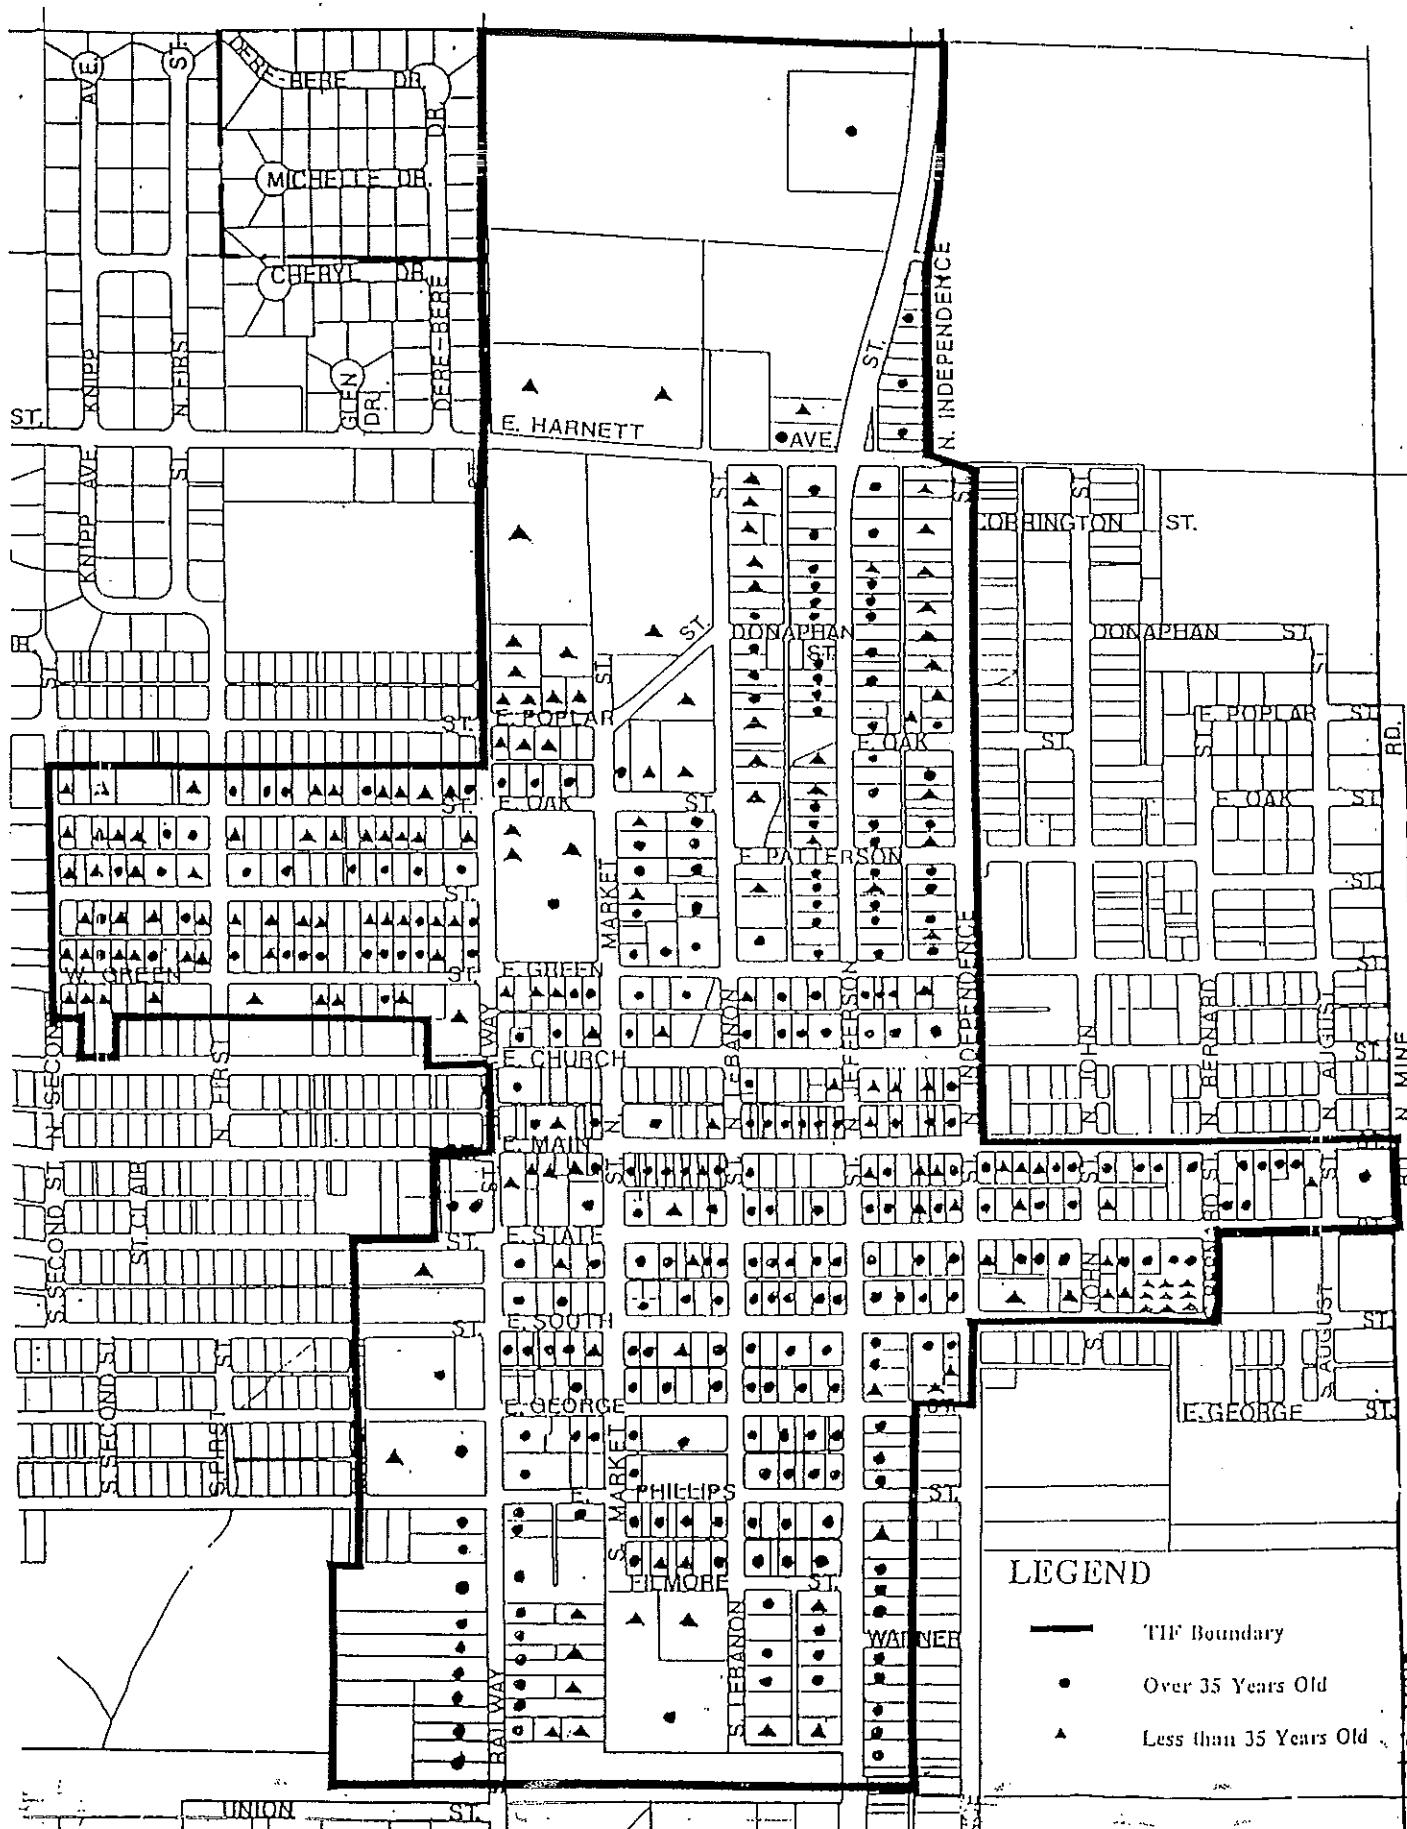

IX. "TIF" SUPPORTING INFORMATION

- Legal Description of Boundary
- Map of TIF District
- List of Property Owners
- Infrastructure Report

MASCOUTAH TIF #2B LEGAL DESCRIPTION

Beginning at a point of intersection between the centerline of Union Street and the centerline of the alley between Jefferson Street (Illinois Route 4) and Independence Street said point being the point of beginning. Thence, west along said centerline of Union Street and the south lines of Parcels No. 10-32-313-013, 10-32-312-010, 10-32-308-032, and 10-31-409-047 to the southwest corner of parcel 10-31-409-047. Thence turning north to the southwest corner of Parcel No. 10-31-409-006, thence turning east along said centerline to its intersection with the centerline of Maple Street extension, thence turning north along said centerline of Maple Street and its extension to the intersection with the centerline of State Street to a point of intersection with the west line and its southerly extension of Parcel No. 10-31-244-027, thence turning north along said west line and its extension to a point of intersection with the centerline of West Main Street, thence turning east along said centerline to a point of intersection with the centerline of Railway Street, thence turning north along the centerline of Railway Street to a point of intersection with the centerline of Church Street, thence turning west along said centerline to its intersection with the west line of Parcel No. 10-31-240-035 and its extension, thence turning north along said property line to its intersection with the centerline of the alley between Green Street and Church Street, thence turning west along said centerline to its intersection with the east line and its extension of Parcel No. 10-31-239-004, thence turning south along said east line and its extension to the centerline of Church Street, thence turning west along said centerline to its intersection with the west line and its extension of Parcel No. 10-31-239-003, thence turning north along said west line to its intersection with the centerline of the alley between Green Street and Church Street, thence turning west along said centerline to its intersection with the centerline of Second Street, thence turning north along said centerline to its intersection with the centerline of the alley between Poplar Street and Oak Street thence turning east along said centerline to its intersection with the centerline of Railway Street, thence turning north along said centerline to its intersection with the north line and its extension of Parcel No. 10-32-160-007, thence east along said north line of Parcel No. 10-32-160-007 to the southwest corner of Parcel No. 10-29-300-014, thence turning north along the west line of Parcel No. 10-29-300-014, to the southwest corner of Parcel No. 10-29-300-002. The TIF Boundary then turns east along the south line of Parcel No. 10-29-300-014 and its extension to a point of intersection with the centerline of Jefferson Street (Illinois Route 4), thence turning south along said centerline to a point of intersection with the east R.O.W. line of Jefferson Street (Illinois Route 4). Thence running southwesterly along the said east R.O.W. line to the point of intersection with the centerline of Independence Street, then turning east and south along the centerline of Independence Street to its intersection with the centerline of East Main Street, thence turning east along said centerline to a point of intersection with the centerline of Mine Road, thence turning south along said centerline to its intersection with the centerline of State Street, thence turning west along said centerline to its intersection with the centerline of Bernard Street, thence turning south along said centerline to its intersection with the centerline of South Street, thence turning west along said centerline to its intersection with the centerline of Independence Street, thence turning south along said centerline to its intersection with the centerline of George Street, thence turning west along said centerline to its intersection with the centerline of an alley between Independence Street and Jefferson Street (Illinois Route 4), thence turning south along said centerline to the point of beginning.

INFRASTRUCTURE REPORT

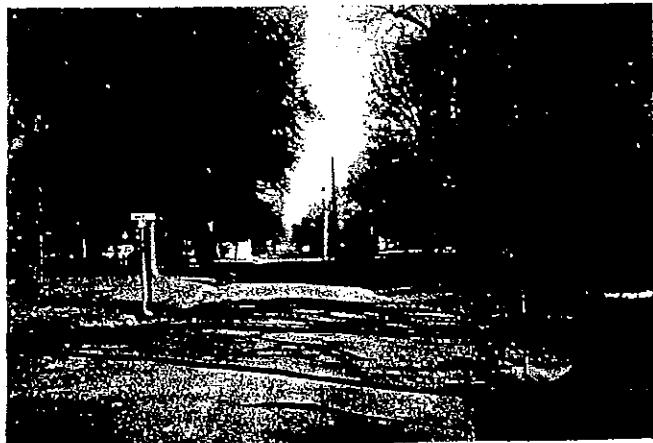

11/15/99

This report is based on the examination of the existing infrastructure in the TIF 2B district of the City of Mascoutah, Illinois. The TIF 2B district covers the oldest section of town dating back to the early 1890's. This area makes up approximately 30% of the population of the city. The district consists of 36,000 l.f. of existing water main, 17,000 l.f. of existing sewer main, and 47,000 feet of roadway. Due to the age of this area, many improvements are needed for the upkeep of infrastructure conditions in the city.

Roadways

The TIF 2B district is located in the heart of the city of Mascoutah. (See Exhibit A) Although, the area of discussion has a location of such, the majority of the roadways would be classified today as local streets. A local street is a street primarily used for access to abutting property with minimum speeds and traffic volumes. The existing conditions along these local streets stand as oil and chip surfaces, 40 to 50 foot wide right-of-ways having variable pavement widths, and the majority lacking any curb and gutter.

Based on the 1996 subdivision ordinance for the City of Mascoutah, all local streets other than state highways shall consist of a 45' right-of-way, 30' pavement width, bituminous concrete or Portland cement concrete, and bound on both sides by concrete curb and gutter. Of the streets within the TIF 2B district, only three streets would meet these standards of which two are Illinois Department of Transportation maintained routes. In the southern most portion of the TIF 2B district, the roadway pavement is barely wide enough for two vehicles, as can be seen in this photo taken along George Street. In order to meet these standards set forth in this subdivision ordinance, approximately 67,000 linear feet of concrete curb and

gutter is needed, many streets will need widened to fulfill the 30' width of pavement, and some will need additional right-of-way.

After a run through all streets within the TIF 2B district, an estimated cost of improvements to meet this ordinance throughout the area would be approximately 8.7 million dollars. This cost was rooted from some specific improvements suggested to be completed within the city.

For instance, along Route 4, or Jefferson Avenue, the roadway is lined down both sides with a variable width rock shoulder. Route 4 is a highly traveled roadway running North and South through Mascoutah. Parking is aloud within city limits along this rock shoulder. In some locations, the width of the shoulder is much too narrow for vehicles to park, and in some cases, the sidewalk is even utilized for parking (see photo). Funding would be used along this route to get the shoulders paved at a uniform width of eight feet with bituminous concrete. Additionally, the placement of concrete curb and gutter along this route will promote drainage off the roadway.

Route 177, or Main Street, is another street of concern for the city. This is the main collector through Mascoutah running East and West. As seen in the picture, the existing curb and gutter is deteriorating from the years of wear and tear, and due to the number of overlays of pavement, it is beginning to disappear. Due to the age of this street, and its location through downtown Mascoutah, extensive work will need to be performed to meet this goal.

Another collector street running North and South through the city is Railway Street. This route

leads to a general business and industrial district that lies on the South side of town. Due to the industry, the route is highly traveled by trucks from Main Street to the businesses. The heavy trucks have caused depreciation of the pavement surface. Multiple cracks can be seen running the length of the con-

crete pavement slabs, and numerous patches exist along the route increasing the roughness. (See photo). Curb and gutter previously was replaced during a water main replacement project along the west side of Railway Street, whereas, along the east side, the curb and gutter is depressed a couple

inches below the pavement surface elevation.

Elevation change across the city of Mascoutah is minimal presenting many problems with drainage in the area. Most of the roadways today, as stated earlier, lack curb and gutter and instead have drainage ditches running the length of the roadways. Although these ditches exist, many have little to no grade. Therefore these ditches serve as storage areas for the storm water which eventually leads to flooding. The addition of curb and gutters will improve the removal of water from roadways and also either decrease or eliminate some of the existing roadway flooding areas.

Water Main

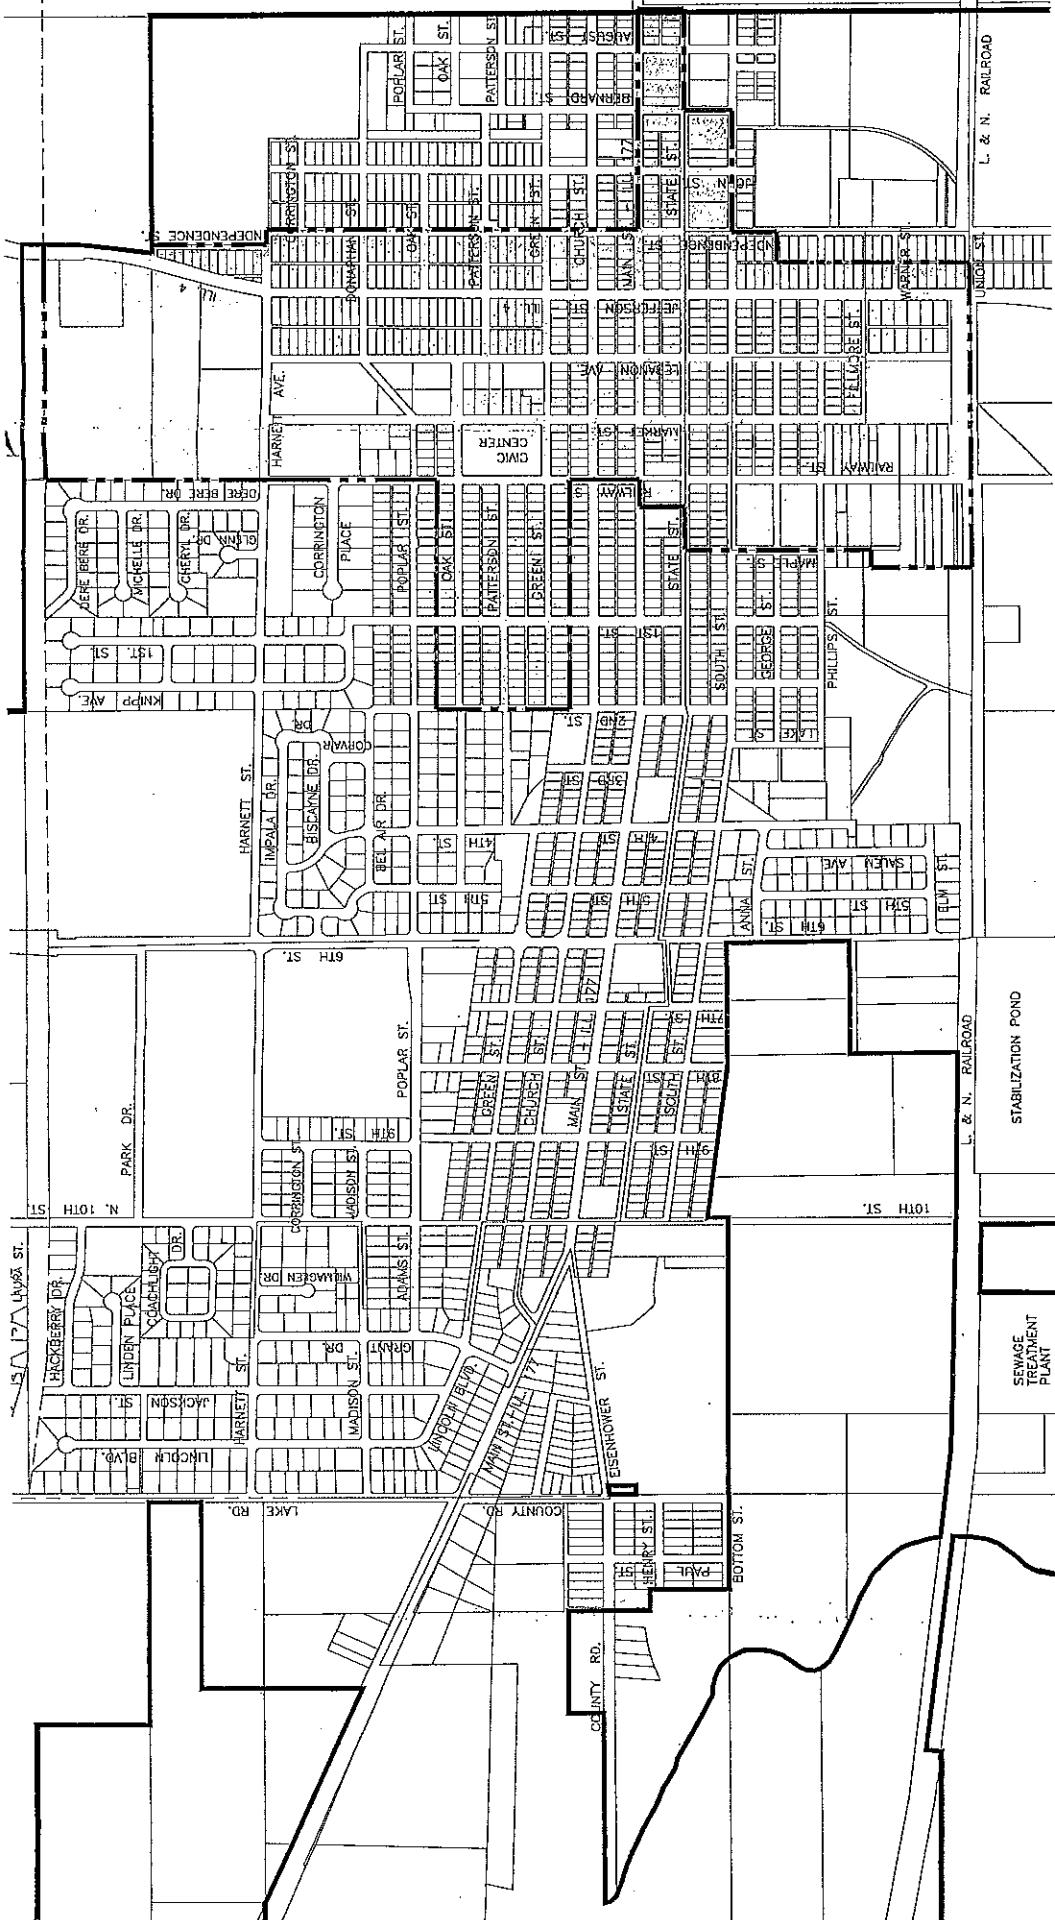

Within the TIF 2B district of the city of Mascoutah, water mains ranging in size from 2 inch to 6 inch are approaching 70 years in age. Conscientiously, the city has worked to replaced approximately half of the 36,000 l.f. of water main in this district within the past fifteen years to P.V.C. pipe (see Exhibit B), but the remaining 2, 4, and 6 inch cast iron pipes are substandard to the Illinois Environmental Protection Agency today. Not only are these pipes of poor quality, the community tolerates low water pressure resulting from the narrowness of the pipe diameters. These small diameter pipes also suffer from mineral deposits in the lines that have built up over the life of the pipe.

Due to the age of these pipes, the city incurs very frequent water main breaks. Not only is this expensive for the city, but inconvenient for the residents. In many cases, when a break occurs, large sections of town must be shut down in order to repair the line. Many of the valves along these substandard lines are frozen open preventing the city from closing off only small portions of town. Replacement of the remaining cast iron pipe, fire hydrants, and valves would drastically improve the water quality for city of Mascoutah residents within the TIF 2B district.

Sanitary Sewer Main

The sanitary sewer existing in the city of Mascoutah TIF 2B district also dates back to the 1930's, 70 years old. During that time period, manholes were built with bricks. Many of these brick manholes still stand in Mascoutah today. The Illinois Environmental Protection Agency considers these structures as less than adequate. After inspection, these manholes were determined to be structurally defective with the possibility of caving in.

Aside from the manhole situation, the aged sanitary sewer interceptor follows an indirect route in order to reach the 4th Street lift station lying on the south side of town (see Exhibit C). Because of this winding route, the residents endure sewer back-ups and basement flooding within the TIF 2B district. A new rerouted sanitary sewer interceptor is recommended for quicker removal of waste from these problem areas. The new interceptor will also alleviate the problems within the city of blockage and infiltration.
